

THE RETURN ON INTELLIGENCE COMPANY

Enterprise companies do not have an AI strategy problem. They have an AI **execution problem**.

Weaver is an AI systems integrator that helps enterprises establish the business case before building and scaling production AI. We use the Return on Intelligence Index to measure our results against our deliverables, improve our customers' ranking on AI execution, and drive the bottom line.

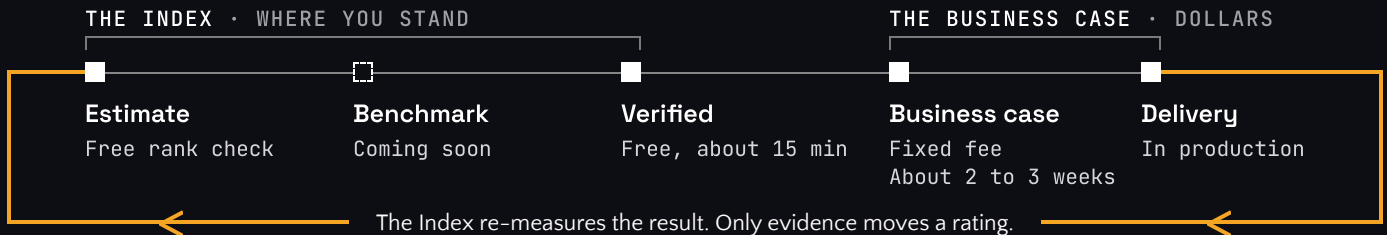

56%

of CEOs have not seen either a cost saving or a revenue generation opportunity from generative AI.
PwC Global CEO Survey, January 2026

MEASURED IN PUBLIC

Every integrator grades its own homework. We publish the ranking we're judged **by**.

The Index ranks 8,000+ companies on AI execution. It is free and refreshed monthly. Scores are never for sale. Working with Weaver doesn't change one. Only evidence does, measured by the same published method for every company.

Delivery: complete agentic builds, migration projects and the Intelligence Factory, our innovation center.

FOUR COMMITMENTS

Business case first

If the case isn't there, we say so.

Production, not pilot

Built to run inside the ERPs, CRMs and data the business already uses.

Fixed fee

The number the CFO approves is the number the CFO pays.

No human left behind

Enablement runs alongside the build.

IN PRODUCTION • MEASURED BY THE CLIENT

30%

Less clinical documentation time
Guardian Recovery

85–95%

Less legal time on first-pass screening
The Telegraph, delivered by You.com and Weaver

1 week

Deployed on-site in Hamburg
dpa

78%

Fewer nursing-course withdrawals in one semester
Maryville University

Know which AI investments deserve the next **dollar**.

A joint venture between TQuila and You.com. Applying AI to business for over a decade.
